Critical Data For

Physical Security Success

Managing and maintaining a physical security system requires tracking and analyzing a lot of data from multiple systems. Rather than manually checking and analyzing data from multiple consoles, Viakoo's service assurance solution automates gathering, analyzing, and reporting.

01

Key Metrics

Access Control Uptime, Video Path Uptime, Video Retention Compliance, Video Stream Deliverability Index

02

Recording System

System Configuration, System Usage, VMS version, VMS processes, Network Adaptor, Network Status, File System, Disk parameters, Storage Adaptor, and more

03

Access Control

Controller Name, AC IP Address, AC Connection Status, AC bitrate to server, AC Latency, AC Firmware, and more

04

Camera Device

Camera Name, Stream Name, Camera Firmware, Connection Status, Bitrate to Recorder, Actual Retention, Camera Uptime, Stream FPS, and more

05

Switch

Switch Name and Model, Latency to Recorder, Switch Uptime, Switch Power Stats, Port Status, Port POE Stats, Port Performance, and more

Viakoo

Don't be unproductive. Viakoo automates the tracking of over 100 operational parameters.
